

Chinnathorn Promnaruritr

Full Stack Developer

My Portfolio

chinnathorn.p@gmail.com

<https://cpxdev.azurewebsites.net>

I've spent the last 5 years as a Full Stack Developer, primarily working with **.NET 8 and Node.js**. I have a strong track record of building complex, high-reliability backends for **Fund Trading and HR systems**. I'm also very experienced with **React**, having built a **full-stack Survey Platform (Node Js + React Js)** from the ground up and architected a reusable component library that improved my team's development speed. I'm now looking for a permanent, in-house role where I can truly own the code and contribute to a product's growth over the long term.

Work Experience

Full Stack Developer (.NET ANALYST)

DEC 2020–DEC 2025

Cube of Nine Co., Ltd, Bangkok TH

- **Architecture & Performance Engineering:** Architected and engineered high-performance back-end services using **.NET 8 and Node.js**, leveraging custom middleware to optimize request-response pipelines and minimize latency across distributed system architectures.
- **Scalable Full-Stack Development:** Spearheaded the development of high-impact web applications using **.NET 8, Node.js, and React JS**, managing the entire software development lifecycle from intuitive UI design to complex back-end logic and database schema optimization.
- **System Reusability & Standards:** Architected a comprehensive library of **reusable React components** and standardized modules, establishing a consistent UI/UX framework and significantly accelerating the development lifecycle across multiple projects.
- **High-Impact Project Delivery:** Successfully delivered mission-critical platforms, including a **Fund Trading system, Survey Platform, and HR Management system on LINE OA**, ensuring high reliability and alignment with complex business requirements.
- **Cloud Infrastructure & Scalability:** Orchestrated and managed both **Monolithic and Microservices architectures** on **Azure and AWS** using **Docker**, ensuring high availability, seamless deployments, and system scalability to support business growth.
- **Data Optimization & Reliability:** Refined database performance (SQL and NoSQL) by implementing **Redis Cache** and optimizing query structures, enabling the system to maintain peak performance during high-concurrency periods.

Education

Bachelor of Business Computer

Graduation: 2019

Dhonburi Rajabhat University, Bangkok TH

Key Skills

1) Backend Development:

- .NET 8, .NET Framework, C#, VB.NET
- ASP.NET MVC, RESTful API Development
- Node.js (Express Framework)

2) Frontend Development:

- React JS, JavaScript (ES6+), jQuery
- HTML5, CSS3,
- Material UI (MUI), Bootstrap 4/5
- Responsive Web Design

3) Cloud, DevOps & Tools:

- **Cloud Platforms:** Azure, AWS
- **Containerization:** Docker
- **Version Control:** Git
- **CI/CD Pipelines**
- **Database and Caching Management:**
- **Relational Database:** MS SQL Server, MySQL
- **NoSQL Database:** MongoDB
- **Redis Cache** (Performance Optimization)

4) Architecture & Systems:

- **Microservices Architecture, Monolithic Architecture**
- **System Optimization**
- **Middleware Design**

Languages

- **Thai:** Native Proficiency
- **English:** Conversational Proficiency
